IDAHO HOT INDUSTRIES

Long-Term Employment Projections by Industry 2006-2016

September 2008

IDAHO
DEPARTMENT OF LABOR

C.L. "Butch" Otter
Governor

Roger B. Madsen
Director

Idaho Hot Industries 2006-2016

What are Hot Industries?

Hot industries are those that on average rank high in three major criteria – the abundance of jobs in the economy, jobs which are growing the fastest and jobs with the highest pay and then ranked according to the following criteria.

Projected Employment 2006-2016 – shows which industries are expected to grow the fastest – percentage growth – and which industries are projected to gain the most jobs – numeric growth.

Median Hourly Wage – the point at which half the workers in an industry earn more and the other half earns less. Median annual earnings of workers were obtained from the May 2008 Occupational Employment Statistics survey release.

What is an industry?

An industry is a group of establishments that perform similar processes used to produce goods or services. An establishment is a single physical location where business is conducted or where services or industrial operations are performed.

How are industries organized?

Industries are organized using the North American Industry Classification System. The classification system uses six-digit codes to identify particular industries. For more detailed industry data, including a full list of “Idaho’s Hot Industries,” visit our Web site at lmi.idaho.gov.

1 Ambulatory Health Care Services

- Provides health care services directly or indirectly to ambulatory patients and does not usually provide inpatient services. Health practitioners in this industry provide outpatient services with the facilities and equipment not usually being the most significant part of the production process.
